

IDENTITY THEFT/ACCOUNT TAKEOVER FRAUD INFORMATION FOR WEALTH MANAGEMENT CLIENTS

Identity Theft/Account Takeover - How does this happen?

This type of crime occurs when a thief obtains personal and banking information and intends to act as you to remove funds from your account, obtain credit and live a lavish lifestyle using your name. This can happen when information is obtained through theft of purses, wallets, home invasions, business theft or obtained through trickery.

A loan application, opening a credit card, opening of a new checking account to the purchasing of a home have all been exploited by thieves using other people's personal information. Identity theft can be difficult to recover from depending on the circumstance. In some cases, the identity thieves use personal information for a short period of time or a one-time occurrence. Other times, the personal information can be used over and over again making the experience for the victim difficult.

The key to minimizing your risk regarding identity theft is to protect your personal information. First Midwest Bank has monitoring systems and employees that are trained to notice transactions and banking activity that may be deemed suspicious.

Listed below are examples of the methods and types of persons that perpetrate this type of fraud.

Methods of Theft

- ◆ Stolen purse or wallet
- ◆ Information stolen from dumpsters
- ◆ Unsolicited phone calls or web sites used to trick the victim into giving personal and banking information
